Data Recovery

About Us

At Osool Data Recovery Company, we are committed to providing leading data recovery solutions with an unparalleled experience of over 18 years. We help companies and individuals recover lost, damaged, or corrupted data from various storage media such as Hard Disk Drives (HDDs), Solid-State Drives (SSDs), RAID systems, databases, and more.

As the leading provider of data recovery services in the Kingdom of Saudi Arabia, we give top priority to security, efficiency, and precision in every recovery process. Whether your data loss is due to accidental deletion, hardware failure, electronic attacks, or ransomware, our team of seasoned experts is ready to recover what matters to you, using the latest technologies and best international practices.

Data Recovery

What We Do?

We provide you with our extensive experience and advanced technologies to offer comprehensive and reliable data recovery solutions. We fully understand that data loss, whether due to hardware failure, human error, or a complex electronic attack like ransomware, can have significant consequences. We use the latest specialized tools and best global practices to ensure a fast, secure, and seamless recovery process.

01. Disk and SSD Data Recovery

We recover lost data from damaged or failed Hard Disk Drives (HDDs), Solid-State Drives (SSDs), as well as flash media (USB, SD Cards).

02. Server and RAID Data Recovery

Specialized solutions to recover lost data from failed RAID arrays, SAN/NAS systems, and virtual environments like VMware.

03. Ransomware Combat and Data Recovery

Advanced services to recover encrypted files after ransomware attacks, with expertise in removing traces of the attack and restoring access to your systems.

04. Database Recovery

Restoring and repairing your vital databases (SQL, Oracle) and recovering lost files from macOS devices and Apple external storage units.

Meet Our Team

Mohamed Al-Arini

Chairman of the Board

As Chairman of the Board, Mohamed Al-Arini leads 'Osool' with a clear vision to provide unparalleled data recovery services. The success of the establishment is based on his firm commitment to quality and building strong relationships with clients based on trust and guaranteed results.

Alaa Al-Din Ahmed

Executive Manager

As the Executive Manager, he manages the company's operational processes. With his experience as a mechatronics engineer and his previous work at Motorola, he ensures the application of the highest technical and administrative efficiency standards to provide the best solutions and services to our clients.

Adel Kahil

Head of Research and Development (R&D)

As the Head of R&D, Adel leads the company's innovation efforts. He specializes in finding solutions for the most complex technical problems, including recovering RAID systems and repairing databases (Oracle, SQL), ensuring the delivery of advanced and reliable services to our clients.

Why Choose Us

We understand how important your data is, which is why we give you good reasons that make us your ideal partner for its recovery:

Over 18 Years of Experience

Many years of success and excellence in customer service and complex data recovery, which has established our position as leaders in the field.

Complete Security and Confidentiality

We adhere to the highest standards of confidentiality and privacy. Your data is in safe and protected hands throughout all stages of the recovery process.

Experts in Combating Ransomware

Pioneers in developing advanced tools to decrypt ransomware and securely recover encrypted files, without the need to pay the ransom.

Free Evaluation and Recovery Guarantee

We offer a free check, and if we can't recover your data, you won't pay any fees. "Money-back guarantee if we don't recover your data."
